NPL STATUS: NA

SITE TYPE MAIN CATEGORIES: Manufacturing/processing/maintenance

SITE TYPE MAIN SUBCATEGORIES: Primary metals/mineral processing

SITE DESCRIPTION:

Coleman Thomas was listed as an unrecognized babbitt metal and solder manufacturer site within Appendix B of a paper titled "Discovering Unrecognized Lead-Smelting Sites by Historical Methods" written by William Eckel et al., and published in the American Journal of Public Health, April 2001, Volume 91, Issue #4 (Eckel Report). In the Eckel Report Coleman Thomas was listed as operating at 13 Reardon Street, Newark, New Jersey. It has been confirmed that operations took place at 5 - 13 Ferdon Street.

Review of documentation suggests that the site has been industrialized since the late 1800s when a Mrs. C. Coleman (Brass Foundry) is depicted on site. Documentation suggests the site continued to operate as a brass foundry in 1908. According to a 1958-1958 New Jersey Industrial Directory, Coleman Thomas operated as a secondary smelter and refinery of non-ferrous metal and alloys. A 1974 Sanborn Map describes operations as scrap metal storage, and the 1988 Sanborn Map suggests the site was not used. Currently the site is operated by Motor City, Inc. as an automotive body and interior repair shop, and employs between 10 and 20 people. Residential apartment buildings are

located adjacently west and southwest of the site.

The site was evaluated only for HRS purposes for a discharge to soil. A Resident Individual, Resident Population, Resource or Terrestrial Sensitive Environment does not exist. There are a number of workers on site; however, the site appears entirely paved therefore even if an area of observed soil contamination was documented there would not be sufficient targets for the site to score greater than 28.5 on the HRS. Based on the information gathered and observations made during the facility inspection, Coleman Thomas Co is not recommended for further assessment under CERCLA.

MEMORANDUM

To: Frank Sorce, Environmental Specialist 4, NJDEP, BEMSA

From: Andrew Cyr, NJDEP, BEMSA

Subject: Investigation Summary
Coleman Thomas Co.
Smelting Site # 23
13 Ferdon Street
Block 1096, Lot 8
Newark, Essex County, New Jersey

AJC 5/7/2012

Coleman Thomas was listed as an unrecognized Babbitt and solder manufacturer site within Appendix B of a paper titled "Discovering Unrecognized Lead-Smelting Sites by Historical Methods" written by William Eckel et al., and published in the American Journal of Public Health, April 2001, Volume 91, Issue #4 (Eckel Report). In the Eckel Report Coleman Thomas was listed as operating at 13 Reardon (Ferdon) Street, Newark, New Jersey.

The NJDEP Responsible Party Investigation Unit (RPIU) reported that they could not confirm Coleman Thomas Co. operated at the 13 Reardon address but rather operated at 13 Ferdon Street. RPIU reported that there are no SRP PI #s for the site; however RTK and air permitting activities are listed at the site under Motor City Auto Body, 7-13 Ferdon Street.

As part of the evaluation of this former smelter site an aerial photograph review was conducted using the NJDEP GIS and the web site www.historicaerials.com. In addition, reviews of the New Jersey Industrial Directories and historic Sanborn Fire Insurance Maps were conducted.

Review of a 1930 aerial photograph provided by the NJDEP GIS the northern portion of the site (along Ferdon Street) is developed, while the southern half is vacant cleared land. The type of operations could not be gleaned from the photograph. A 1954 photograph depicted buildings constructed over most of the site. A 1966 and 1969 photographs show

little change, smoke is clearly visible emanating from a building located within the western portion of the site. Sometime between 1987 and 1995 several of the on-site buildings appear to have been demolished. One building located along the eastern side appears standing. Sometime between 1995 and 2002 a new building was constructed in the eastern and southern portions of the site. An open parking area can be observed in the 2002 and the 2008 aerial photographs. Based on current aerial photography the site is either covered with buildings or parking lot.

Reviews of Sanborn Fire Insurance maps revealed the following:

1892 Sanborn Map (Vol. 4 Sheet 335)

A Mrs. C. Coleman (Brass Foundry) is depicted on site.

1908 Sanborn Map (Vol. 1 Sheet 59)

The Sanborn Map depicts a T. Coleman (Brass Foundry) on site. A small furnace can be seen. The 1908 Sanborn Map also depicts a Japanning operation across Ferdon St. and a leather manufacturer (Thos. F. Preston) at approx. 26 Ferdon St.

1931 Sanborn Map (Vol. 8 Sheet 912)

The Map depicts a metal smelting & refining operation at approx. 9-13 Ferdon Street. Domestic dwellings are depicted along Wheeler Point Road. The metal Japanning shop located across Ferdon is still in operation.

1950 Sanborn Map (Vol. 8, Sheet 912)

The Map indicates that a Thomas Coleman Smelting & Refining Company was operating on site. Based on the Sanborn Insurance Map it appears that operation extended onto current Block 1096, Lot 45, where there was an office and scrap metal storage building constructed. Two cupolas are depicted in the western portion (Delancy Street Side). The metal Japanning facility located across Ferdon St. is still operating under the name Reliance Japanning Co. (AKA Reliable Japanning). A Brass Foundry (Economy Foundry) is in operation at the corner of Wheeler Point Road and Backus Street, east of the site.

1974 Sanborn Map (Vol. 8 Sheet 912)

The Map depicts Thomas Coleman Co. on site and lists the use as scrap metal storage. A machine shop is depicted at 15 Ferdon Street. Reliable Japanning is still operating at 14 Ferdon Street and the Brass Foundry located at Backus and Wheeler Point Road has expanded to extend from Backus to Ferdon along Wheeler Point Road and has been renamed Federal Bronze Products Inc. (Brass and Aluminum Foundry). Dwellings are still located along Wheeler Point Rd between Ferdon St. and Delancy.

1988 Sanborn Map (Vol. 8 Sheet 912)

The Map depicts no business at the site. Three buildings are depicted on site, a 2-story residence located at 5 Ferdon Street, a large single story warehouse occupies the western half of the site and a single-story warehouse at 13 Ferdon Street. Federal Bronze and Reliable Japanning are still operating across Ferdon Street.

A limited search of the New Jersey Industrial Directories revealed listings for Coleman Thomas in the 1958-59 Directory at 5 to 13 Ferdon Street with operations listed as secondary smelter/refinery of nonferrous metal and alloys. The 1954-55 Industrial Directory lists Coleman Thomas operating as scrap iron and metals facility. In the 1940-1941 Directory Coleman Thomas Smelting & Refining Co., Inc. is listed and in a 1927 Directory Coleman Thomas is listed as a refiner of precious metals. No listings for Coleman Thomas were found in NJ Industrial Directories dated 1964, 1968, 1970, 1974, 1978, 1982 and 1987.

An internet search (Google) for 5 to 13 Ferdon Street Newark, NJ resulted in the following: Motor City Inc. operates the site as an automotive body repair facility. A machine shop (Machined Parts Inc.) is located at 17 Ferdon Street. It appears that apartments are located along Wheeler Point Road and Ferdon Street.

The site, Block 1096, Lot 8, has a listed address of 3 – 13 Ferdon Street and is currently owned by Costeira M. & Henriques M. whose address is 11 Ferdon Street Newark, NJ.

An NJEMS search indicates that Motor City, Inc., ID # NJD986587574 is a hazardous waste generator. A hazardous waste inspection conducted on August 1, 2011 noted several violations.

An area recon conducted on April 26, 2012 confirmed that the site is operated by Motor City Inc. as an automotive body repair facility. Residential apartments are located along Wheeler Point Road. The site appears completely paved and/or developed. No on-site residential use was observed.

Requirement	Status RTC	Results or Comments	Req. Source Ref # Req. Type
-------------	---------------	---------------------	-----------------------------------

Subject Item: HSAT - Satellite Reqs

Operating Status: No status specified.

Comments: No comments added.

*SATELLITE REQUIREMENTS

H ☐ One (1)-gallon satellite accumulation container (SAC) was found on the paint bench found directly outside of the paint mixing room. This SAC was found to have been empty, and not marked/labeled according to 40 CFR 262.34(c)1(ii). MCI marked the container with the words "Hazardous Waste" upon this inspector's instructions. No NOV's were issued.

Rules
T

Did the generator ensure that the quantity of waste in each satellite accumulation area was no more than 55 gallons of hazardous waste or no more than one quart of acutely hazardous waste or had the area at or near any point of generation? [40 CFR 262.34(c)(1)]

IC ☐

Rules
T

Did the generator mark satellite accumulation containers with the words "HAZARDOUS WASTE" or other words which identify the contents of the container? [40 CFR 262.34(c)(1)(ii)]

IC ☐

No waste was found being stored inside of the satellite accumulation container.

Rules
T

Did the generator accumulating waste, in satellite accumulation area(s), in excess of the amounts listed in 262.34(c)(1) mark the container(s) holding the excess accumulation of hazardous waste with the date the excess amount began accumulating? [40 CFR 262.34(c)(2)]

*THE MANIFEST	H <input type="checkbox"/>	A total of fourteen (14) hazardous waste manifests, dated 11/29/06 through 7/28/11, were reviewed. All of the manifests were found to have been properly completed, and in compliance.	Rules T
Did the generator prepare a manifest before transporting or offering hazardous waste for transport off-site?. [40 CFR 262.20(a)(1)]	IC <input type="checkbox"/>		Rules T
Did the generator properly complete the manifest(s)?. [40 CFR 262.20(a)(1*)]	IC <input type="checkbox"/>		Rules T
Did the generator designate an authorized facility on the manifest?. [40 CFR 262.20(b)]	IC <input type="checkbox"/>		Rules T
Did the generator designate an alternate facility or instruct the transporter to return the waste when the transporter was unable to deliver the waste?. [40 CFR 262.20(d)]	NA <input type="checkbox"/>	No history of rejected/returned hazardous waste shipments.	Rules T
Did the generator use EPA approved manifest forms for shipments of hazardous waste? [40 CFR 262.21(g)(1)]	IC <input type="checkbox"/>		Rules T
Did the generator determine if generator or consignment state regulates additional wastes or requires the generator to submit copies of the manifest?. [40 CFR 262.21(g)(2)]	IC <input type="checkbox"/>		Rules T
Did the generator sign the manifest?. [40 CFR 262.23(a)(1)]	IC <input type="checkbox"/>		Rules T
Did the generator obtain the signature of the initial transporter and date of acceptance on the manifest?. [40 CFR 262.23(a)(2)]	IC <input type="checkbox"/>		Rules T
Did the generator retain one copy of the manifest in accordance with Sec. 262.40(a)?. [40 CFR 262.23(a)(3)]	IC <input type="checkbox"/>		Rules T
Did the generator supply the transporter with remaining copies of manifest?. [40 CFR 262.23(b)]	IC <input type="checkbox"/>		Rules T
Did the generator shipping hazardous waste within the U.S. solely by water send 3 copies of the manifest form signed and dated to the owner or operator of the designated facility or last water transporter in the U.S.?. [40 CFR 262.23(c)]	NA <input type="checkbox"/>		Rules T

Subject Item: HSQG - Generator SQG Reqs

Operating Status: No status specified.

Comments: No comments added.

Did the generator send at least 3 copies of the signed and dated manifest for rail shipments of hazardous waste within the U.S. to next non-rail transporter, designated facility, or last rail transporter in the U.S.? [40 CFR 262.23(d)]	NA <input type="checkbox"/>		Rules T
Did the generator certify to one of the statements in Item 15 of the hazardous waste manifest? [40 CFR 262.27]	IC <input type="checkbox"/>		Rules T
*PRE-TRANSPORT REQUIREMENTS	H <input type="checkbox"/>	MCI recently had a shipment of hazardous waste offsite, for disposal purposes. MCI had additional hazardous waste storage containers onsite, but was not preparing them to be transported offsite, at this time of this inspection.	Rules T
Did the generator package hazardous waste in accordance with 49 C.F.R. Parts 173, 178, and 179? [40 CFR 262.30]	NA <input type="checkbox"/>		Rules T
Did the generator label each package of hazardous waste in accordance with 49 C.F.R. Part 172? [40 CFR 262.31]	NA <input type="checkbox"/>		Rules T
Did the generator mark packages of hazardous waste in accordance with 49 C.F.R. Part 172? [40 CFR 262.32(a)]	NA <input type="checkbox"/>		Rules T
Did the generator mark each container of hazardous waste with the proper wording or display the wording in accordance with 49 C.F.R. 172.304? [40 CFR 262.32(b)]	NA <input type="checkbox"/>		Rules T
Did the generator placard or offer the appropriate placard for a vehicle containing hazardous waste, in accordance with 49 C.F.R. Part 172, Subpart F? [40 CFR 262.33]	NA <input type="checkbox"/>		Rules T
Did the generator clearly mark each container of hazardous waste with the date when the accumulation period began, and make the mark visible for inspection? [40 CFR 262.34(a)(2)]	OC <input checked="" type="checkbox"/>	Failure of generator to clearly mark container with date when accumulation period begins or to make mark visible for inspection. Specifically, Motor City Inc. failed to mark two (2)-55 gallon storage drums of listed (F003/F005/D001/D035) hazardous waste, with the date upon which each period of accumulation begins, in violation of N.J.A.C. 7:26G-6.1(a) and 40 CFR 262.34(a)2*.	Rules T
Did the generator clearly mark each container or tank with the words "Hazardous Waste"? [40 CFR 262.34(a)(3)]	OC <input checked="" type="checkbox"/>	Failure of generator to clearly mark each container or tank with the words "Hazardous Waste". Specifically, Motor City Inc. failed to mark and/or label two (2)-55 gallon storage drums of listed (F003/F005/D001/D035) hazardous waste, with the words "Hazardous Waste", in violation of N.J.A.C. 7:26G-6.1(a) and 40 CFR 262.34(a)3.
